Swan Island Dahlias

CANBY, OREGON

Dick and Shirley McCarter

One of the World's Largest Dahlia Growers

Dear friends:

It is our pleasure to send you our first 24-page colored dahlia catalog, containing hundreds of varieties, some of which won for us the Oregon State Fair SWEEPSTAKES RIBBON again this past fall!

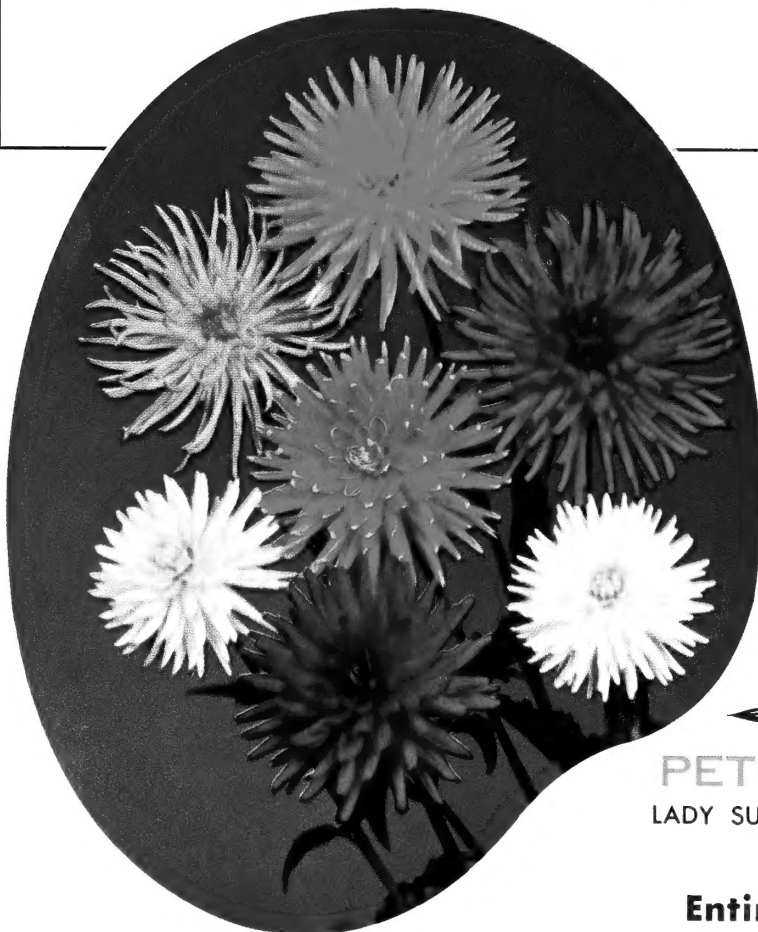

Your wonderful support has been greatly appreciated, and has made it possible for us to continue raising newer and better dahlias each year.

The gardens are open to the public during blooming season, which is usually from mid-August to mid-October. We welcome and encourage you to drive out and see the glorious display of God's art work. Millions of blooms of all colors, sizes, and shapes will greet you, and we are sure will make your trip well worthwhile!

For those of you unable to drive to the farm, each fall we have a continuous schedule of dahlia shows here in the Northwest to give you an opportunity to see the actual blooms. The shows start in late August and continue through September. The largest is our indoor show here at the farm, generally held the middle of September. Orders may be placed at these shows and are held for spring delivery.

Again our thanks for your patronage, and we will be pleased to serve you with our guaranteed top quality tubers! May your dahlia garden bring you countless hours of enjoyment.

By popular request we are offering you an opportunity to have this specially selected group of cactus dahlias best suited for cutflowers. Through our experience in handling cut blooms we have been able to determine which varieties hold up the best for cutting, and have made up two collections from this list. We would like very much to picture all the better "cutters," however, space does not permit it! Full descriptions of these varieties are given on pages 5 and 6.

VAMPYR, FRESCO, GRANDMASTER BERGER, RIVOLI, HOLLYWOOD STAR

ENTIRE COLLECTION FOR ONLY (Reg. \$8.50)

The popularity of our cactus dahlias increases each year and we know you will be more than pleased with these six outstanding varieties! This collection appeared on our cover last year, and proved to be so popular that we are offering it again at this special price!

Did you know??

A STUNTED DAHLIA bush is not necessarily infected with mosaic disease. Insects can cause a bush to be stunted. Dust or spray first when your bush is about 6" high — Periodic applications will save you money — grief — and bugs!

A WELL FED, well watered bush will be less apt to attract insects than a poorly cared for bush!

DAHLIAS WILL TEND to "pop" their centers when planted too early and come into bloom during the hottest weather (July and August).

NEVER PLANT dahlias in shade or under trees and expect anything but poor results. Give them an open sunny location and save the shade for begonias or other shade loving plants.

DO NOT leave the "handle" on the clump after digging. Cut the stalk off as close to the clump as possible. At least 75% of the rot in storage is directly connected with this "handle."

BE CAREFUL of the "drying" after digging recommended by so many articles and books on dahlias. The only time drying is necessary is when you have heavy clay soil and when your storage is going to be very cool and moist with no ventilation. If your storage is hot (over 45 to 50 degrees) and dry, put away your tubers as soon as possible after digging. Never let them sit in the hot sun or wind.

READ the helpful hints we send free of charge with your order. You may save the life of a dahlia tuber!

The History of Your Swan Island Dahlia Tuber

DAHLIA PLANTING made easier — this machine plants several thousand tubers per hour. Planting begins in mid-April and lasts until early June.

DIGGING BEGINS in mid-October to assure having the crop dug before the end of November. After the tops have been mowed, the long feeder roots are cut under the ground by a plow share. Men with forks then very carefully lift the clumps out of the ground. The stalk is then cut off close to the clump and the clumps packed in trays.

MILLIONS OF BLOOMS at one time are the reward for all the hard work of the rest of the year. Note the uniformity of the plants, indicating a healthy vigorous growth. Visitors are always welcome to inspect our fields and enjoy this beauty with us.

AN AUTOMATIC WASHER has been designed to wash the clumps in the trays and eliminate handling and consequent breakage. The screen bottoms of the trays allows the fine spray of water (about 200 gallons per minute) to wash the dirt from both the tops and bottoms of the clumps. After washing, the trays are hauled into our modern, specially designed frost proof basement warehouse.

A REGULAR DUSTING and spraying program at Swan Island Dahlia's Canby farm assures disease free stock. This begins in the early summer when the plants are about six inches high and lasts throughout the season.

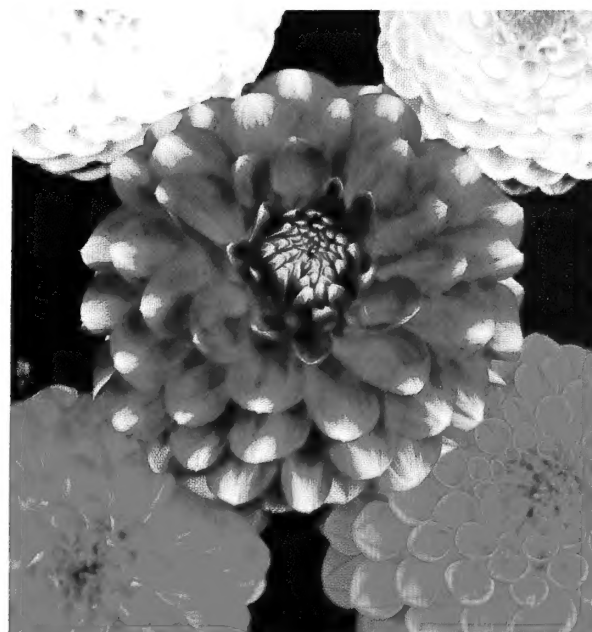

DIVIDING DAHLIA clumps is a highly skilled job which takes several years to master. Women at the far end send their flats of divided tubers down on the endless belt to the women at the near end, who trim off the excess roots. Tubers are then counted into paper lined crates and stored in a 35 to 40 degree warehouse until they are reselected prior to shipping.

BALL DAHLIAS

Ball dahlias are shaped exactly like the pompons, but have larger blooms, ranging from 3" to 6" across. Good for cutflowers and are very popular.

POMPON DAHLIAS

These dainty pompons (often referred to as button dahlias) are admired everywhere for their outstanding qualities as cutflowers. They produce a profusion of blooms (up to 100 on a plant at one time) averaging 1½" in diameter on long, strong stems that last for days when cut. The more you cut them — the more they bloom! Include a few in your garden for that "cheery" touch.

DISBUDDING (removing all but the terminal or end bud on a stem) will produce maximum sized blooms and stronger stems.

PLANTING DAHLIAS here in the Northwest BEFORE APRIL 15th is not recommended. We can not be responsible for our tubers if planted too early as dahlias may rot from the cold, wet earth.

BLOOMS ON A and B size dahlias are always larger at the beginning of the season, with later blooms coming somewhat smaller.

BALLEGO'S GLORY

NO OTHER FLOWER rivals the dahlia in the wide range of color, size, and types available. Today it can truly be said that no flower garden or landscape planting is complete without them.

STAKE — at planting time. (Tie an aluminum tag to the stake for permanent record.) Dahlias are more fun to grow if you know the names!

ON LARGE flowering dahlias cut out the top 6" of your bush when it is 12" to 18" high, as this will give you both a nicer bush and better flowers.

DIXIE'S WINEDOT

PREMIER'S WINSOME

THE MORE YEARS of experience your dahlia supplier has, the more reliable is his information. Know your grower!

ONE OF THE reasons for the wide popularity of dahlias is that good results can be had with very little care. But remember — a little extra care will give you outstanding results and an even more beautiful garden.

Swan Island's Famed

Here at last you can have the unusual in your garden. From the tiniest "thumb nail size" blooms to the unique collarettes and "pin cushion" anemones! Certainly musts for cute borders — dainty little arrangements — and something different in your flower bed!

JAPANESE BISHOP

Still the most popular dahlia of any type year after year! Rich dark red flowers contrast strikingly with very dark, almost black foliage, making each bush a beautiful picture plant. Widely used in many yards as a hedge, or as a foreground for taller growing varieties, as Japanese Bishop rarely grows over 3 feet in height. A real gem to add that touch of distinction to your garden. Flowers last well when cut and are produced in abundance.

DWARF DAHLIAS

These little charmers impressed all visitors to our fields again this year with their mass of blooms and riot of color. The plants seldom grow over 18" in height and are covered with dozens and dozens of gay bright daisy-like flowers ideal for cutting as well as border effects. They begin to bloom about 60 days after planting and will continue until frost, as long as the old dead flowers are kept cut off the plants. Advance bookings have been exceptionally heavy again this past fall, so order early to avoid disappointment.

IMPORTANT NOTICE to Northwest Gardeners — Because of our wet spring weather, we can make absolutely no guarantee on tubers requested for delivery prior to April 15. Give your dahlias a chance and wait till the ground warms up before planting.

WAIT!! — before pulling out the bush that you think has mosaic!! It may be insect damage, so first apply dust or spray. Water well, and of course be sure your soil has an adequate food supply. Give your bush a 30-day fair trial and be sure.

GROWING DAHLIAS

PLANT after danger of frost. Hole about 6" deep. Set stake at planting time. Thoroughly mix in cup of bone-meal or rotted manure. Place tuber flat with sprout up. Cover lightly. Fill in as plant grows.

IF DRY, water well when you plant and give thorough soaking every week to 10 days after.

FERTILIZE with one good application of barn manure or several light applications of commercial (such as 5-10-10) when blooming.

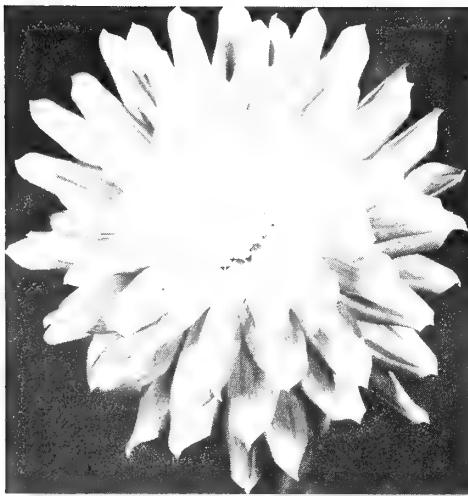

CONTROL BUGS with DDT or Lindane for thrip, Leaf Hoppers, and cucumber or spotted beetle. Tobacco dust or spray for aphids. Malathion for Red Spider mites.

CUT FLOWERS late afternoon or early morning. Boil stems 60 seconds then immerse in deep water in cool place several hours before arranging.

DIG DAHLIAS late in fall, usually after frost. Lift carefully and store in cool (35° to 50°) place. Inspect monthly. If tubers shrivel, storage is too hot and dry. Mold can be controlled with ample ventilation.

TERMS OF SALE

1. All bulbs are fully guaranteed to be true to name and free from disease and any which prove otherwise will be replaced cheerfully upon return.

PINK CUSHION
CHRYSANTHEMUMS

CHOICE CHRYSANTHEMUMS

Chrysanthemum plants will be shipped from April 22nd through June 4th. Plants will not be ready any sooner, so please do not ask for earlier shipment. We ship large, well rooted plants.

SPoon MUMS

These delightful mums remind one somewhat of a cactus dahlia except that the ends of the tubular petals flatten out in a tiny spoon. They are uniquely artistic and especially delightful for flower arrangements. In some varieties the spoon is the same color as the tube and in others there will be a variation in shade. Bushes average 3' to 4' in height.

YELLOW PUMPKIN WHITE BRONZE PINK

5 for \$2.00 10 for \$3.75

CUSHION MUMS

These attractive gay little mounds of flowers are among the easiest of all mums to grow and have no superior in the garden world for borders or large rock gardens. Marvelous for mass effects, they are also extensively grown as potted plants. Their early blooming habits delight the gardener in the North where fall storms frequently interfere with proper blooming of later blooming types. They can very successfully be left in one spot for several years with larger and more spectacular displays of glorious color as the plants become larger. Try some of these compact little beauties this year and use dahlias of a complementary color for background. 12" to 18" high.

6 Large Well Rooted Plants \$2.00
12 for only \$3.75

SPIDER MUMS

Now you can enjoy the magnificent beauty of graceful spider mums in your own garden! The large flowers have sharp quilled petals like a cactus dahlia, but with an open tip which curls up, making a hook on the end of the petal. With disbudding you can have flowers 6" or more across — just like those costing several dollars a dozen in flower shops. Blooming period from middle of October on.

WHITE YELLOW PINK BUFF LAVENDER BURGUNDY

6 Fine Large Plants \$2.50 12 for \$4.50

EARLY ENGLISH MUMS

English mums have been gaining more in popularity for the last several years than any other type because of their early blooming habits and large flowers. With disbudding and proper feeding flowers 5" to 6" across can readily be had. Without disbudding flowers will still be substantially larger than those of other standard types. The plants in this well balanced selection are all grown from outdoor raised stock and will delight the connoisseur as well as the beginner.
